

# NuPlus – the Most Highly Evolved Food on the Planet. You probably wouldn't be interested!

NuPlus saved my life. I'm extremely grateful for that – since I really love me life – but now it's taken the thrill out of trying to save it. I used to live on hope you see. I was so unhealthy that a major part of my life revolved around me getting better and a major thrill was to try that new product with hopes that THIS one would be the one that made a difference. Now its - Been there – Done that.

I've been trying to find something new and better now for 25 years and I CAN'T . I'm familiar with almost every product in the health food store and believe me there are thousands. You would think I would come across *something* to keep me on the path but I have failed.

## **4 Reasons Why NuPlus is THE superior food/supplement for: Energy, Craving Reduction, Weight Reduction, and Whole Body Balancing.**

**1. Its WHOLE food.** If you were stranded on a desert island – what would you wish for? A box of whole food or a box of vitamin pills? The body is set up to eat whole foods which has thousands of nutrients in it that we may never fully understand. Once we break those apart we can never can put back together AS food.

**2. Its LIVE whole food.** Life comes from life. NuPlus has all the live enzymes that keep it fresh and digestible and has many of the benefits of raw foods that people enjoy. Energetic testing shows it to be a VITAL as lettuce picked from your garden or fresh sprouts. I don't know how the company manages that since it is CONCENTRATED but I attribute that to secret Chinese knowledge.

**3. Its live whole food with lots of VARIETY .** No single plant can sustain a person and it is naive to think that a single exotic berry can solve all your health problems. In fact every plant has a tiny bit of toxin in it and eating

too much of one thing can cause imbalance. NuPLUS is a mixture of 14 whole foods on the label and at least that many that don't have to be listed because they are used to treat the foods before they are concentrated or just too minimal amounts. (more Chinese secrets)

**4. It's a variety of foods that has been FORMULATED correctly!** Did I mention this was Chinese? The Chinese spent thousands of years figuring out which foods and herbs worked together for maximum effectiveness. They dealt with 40,000 plants. I have visited the plant where they formulate and concentrate this product. It is so high tech and pure (since they don't use preservatives) that you have to wear smocks , face masks, hair nets and little booties on your feet. It looks like those clean rooms where they make computer chips. Unfortunately we were whisked through so fast I didn't pick up any of those Chinese secrets.

## **Besides the basics to why this product is so irritatingly superior are a number of other benefits**

A. NuPlus is also tasty and extremely convenient. Most people eat it in a powder form which has flavours like, Berry and Pina Banana. My favourite is Apple Cinnamon which I put in my morning green smoothie.

B. NUPlus also comes in a SNACK or BAR form with Chocolate flavour, fruit flavour and even Cheese.

C. NuPlus has a host of benefits; including feeding the immune sytem, feeding the nervous sytem, feeding the metabolism and the brain.

Does it get any better than this? I think not. That's my problem. I guess I just wanted to complain!
